Leon Avshalom

DevOps Team Lead · DevSecOps · Cloud Platform

054-7363558 · leon.avshalom@gmail.com

SKILLS

Cloud
AWS (EKS, VPC, IAM & Identity Center, RDS, KMS, WAF, Verified Access, Bedrock, CloudWatch), Azure (AKS, VNET)

Kubernetes & GitOps
EKS / AKS, Helm, ArgoCD, Istio (multi-cluster), Cilium, Karpenter, KEDA, cert-manager, External Secrets, Docker

IaC & CI/CD
Terraform, Terragrunt, GitHub Actions (OIDC, reusable workflows), Jenkins, Ansible

Security
SOC 2 Type II, threat modeling, Kyverno / Rego policy, kube-bench (CIS), Trivy, Gitleaks, SAST/DAST, Keycloak, OAuth2/OIDC, CNAPP/CSPM, Burp Suite

Observability
Grafana, Prometheus, Loki, Tempo, Mimir, Alloy, OpenTelemetry, Langfuse, Fluent Bit, Splunk

Data & Messaging
PostgreSQL, NATS JetStream, Kafka (Strimzi)

Languages
Python, Bash, HCL, Go (basic), Node.js, C, Rust

AI Tooling
Claude Code agents & plugins, AI-in-CI automation, SageMaker

PROJECTS

Security Community · TAMI Hackerspace
Run weekly security workshops — CTFs, cloud security, reverse engineering. 50+ sessions.

Linux From Scratch
Built a custom Linux distribution (LFS 12.4) — kernel, boot and system internals.

RF & Embedded
SDR / GNU Radio signal analysis (HackRF, RTL-SDR), Arduino + RF experiments, WireGuard VPN, AI multi-platform UI.

LANGUAGES

Hebrew Native · **English** Fluent
Russian Proficient

PROFILE

DevOps Team Lead with a path from military network operations through Tier-III NOC to DevSecOps. Hands-on with **AWS and Azure infrastructure-as-code, multi-cluster Kubernetes, GitOps delivery, observability and security compliance**, including serving as deputy CISO for a SOC 2 Type II program.

EXPERIENCE

DevOps Team Lead
Aug 2026 – Present

DevSecOps Engineer
2023 – 2026

Moveo Group HLS

- Lead the DevOps team: set platform standards, review infrastructure and pipeline changes, and mentor engineers.
- Led DevSecOps initiatives for high-scale production distributed systems in Linux environments across AWS, Azure and on-prem infrastructure, supporting enterprise and government clients — including end-to-end ownership as sole DevOps engineer.
- Designed and implemented security-focused infrastructure-as-code using Terraform and Terragrunt across multi-account environments, including IAM, networking (VPC/VNET, DMZ segmentation, WAF), Kubernetes (EKS/AKS) and observability stacks.
- Built and operated multi-cluster Kubernetes platforms with Istio service mesh, autoscaling (Karpenter, KEDA) and GitOps delivery via ArgoCD and Helm.
- Built and maintained secure CI/CD pipelines (GitHub Actions, ArgoCD) with build-once image promotion, keyless OIDC deploys and rollback, integrating SAST/DAST, dependency scanning, container image scanning and artifact signing.
- Performed security reviews and threat modeling for cloud-native architectures, including multi-cluster Kubernetes and identity-based access systems (SSO, least-privilege IAM/RBAC, policy-as-code).
- Acted as **deputy CISO on a SOC 2 Type II program**: drove security controls implementation, audit readiness, risk assessments and compliance governance.
- Delivered key security and platform projects: **air-gapped Kubernetes observability stack**; **FedRAMP-aligned multi-cluster EKS** architecture; **Azure AKS migration** for large-scale production systems; LGTM observability with OpenTelemetry; AI-agent automation for code review and security triage in CI; **SOC 2 certification** completion.

NOC Engineer, Tier III
2021 – 2023

Teridion

- 24/7 operations and incident response for Linux-based SD-WAN infrastructure spanning 12+ cloud providers; owned SLA tracking, escalations and post-incident analysis.
- Automated triage, diagnostics and playbooks in Python and Bash; contributed to internal FinOps and cost/performance tooling.

Network Manager / Team Leader
2018 – 2021

IDF — Unit 502

- Led real-time response to communication and computing failures across 20+ defense sites, deploying and maintaining critical infrastructure for military and intelligence bases, Rafael and Ministry of Defense facilities.

EDUCATION

Open University — Computer Science & Physics courses — Present
DevOps Experts Bootcamp — CI/CD, Kubernetes, AWS, Terraform, Ansible — 2022
Tel Aviv University — Computer Science & Python (online campus) — 2020
